PROFESSIONAL SUMMARY

Frontend Developer with 7+ years of experience building and maintaining production web applications across AdTech, fintech and software product companies. Strong hands-on skills in React.js, JavaScript (ES6+) and TypeScript, with a focus on reusable component libraries, state management (Context API, Redux Toolkit) and REST API integration. Turns Figma designs into responsive, accessible (WCAG), cross-browser interfaces using Tailwind CSS and Sass. Experienced in Agile sprints and cross-team delivery, and comfortable debugging UI and frontend issues with backend developers and other teams and owning frontend work from component design through testing and CI/CD release. Experienced in using AI-powered coding assistants, including Claude and GitHub Copilot in VS Code, to support code generation, debugging, refactoring, testing, and documentation.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS, Tailwind CSS, Bootstrap 5, Flexbox, CSS Grid, jQuery, GSAP animations

React and State Management: React Hooks, custom hooks, Context API, Redux, Redux Toolkit, component-based architecture, reusable component libraries, shadcn/ui

APIs and Data: REST API integration, JWT authentication, Chart.js data visualisation, PHP form validation, Laravel/PHP (basic), python, MYSQL, Node js, Express Js

Testing and Quality: Jest, React Testing Library, Cypress, unit testing, cross-browser testing, debugging, code reviews

Design to Code: Figma to React/HTML, PSD to HTML, responsive and mobile-first design, web accessibility (WCAG), design systems, theming (light/dark mode)

Performance: Code-splitting, lazy loading, image optimisation, page-speed optimisation, SEO-friendly markup

Tools and Workflow: Git, GitHub, GitLab, Jira, Agile, Jenkins (CI/CD), Webpack, npm, yarn, VS Code

CMS and Marketing Tech: WordPress, HubSpot CMS, Webflow, HTML email templates, Mailchimp, Freshsales

AI-Assisted Development: Claude, ChatGPT, Gemini for code review, test generation, documentation and debugging

PROFESSIONAL EXPERIENCE

Frontend Developer | **Affinity Global Inc.** | Jul 2022 – Jul 2026
AI-powered, privacy-first AdTech company that helps publishers and advertisers grow revenue and reach new audiences online.

- Designed and built a modular React.js component library used across the company's AdTech dashboards, which sped up new feature work and removed design inconsistencies between teams.
- Converted complex Figma designs into pixel-accurate, responsive, WCAG-compliant interfaces, with zero accessibility audit failures across delivered features.
- Built multi-step form workflows for the campaign console, using controlled form state and validation logic to check that a campaign is ready to submit.
- Managed shared dashboard state with Redux Toolkit and Context API, and integrated REST APIs to show live campaign and reporting data.
- Debugged UI and frontend issues and fixed them together with backend developers and other teams, keeping releases stable.
- Improved performance of high-traffic advertiser-facing tools using code-splitting, lazy loading and image compression.
- Deployed and released frontend projects through Jenkins build pipelines, working in Git/GitHub and Jira with the wider team.
- Built and maintained product-launch landing pages in WordPress and HubSpot CMS, which supported measurable lead-generation growth.
- Used AI tools for code review, refactoring, unit test generation and documentation.

Frontend Developer | **10kInfo Data Solutions Pvt. Ltd.** | Jul 2021 – Jul 2022
Business intelligence platform that gives investors and business leaders easy access to real-time financial data and insights for timely, informed decisions.

- Built responsive, mobile-first dashboard and data pages with HTML5, CSS3, Bootstrap 5 and JavaScript, and delivered on time within Agile sprints.
- Integrated REST APIs into dynamic interfaces to show real-time financial data clearly to end users.
- Debugged UI and frontend issues and resolved them together with backend developers and other teams.
- Fixed cross-browser issues across Chrome, Firefox, Safari and Edge, which reduced frontend support tickets.

Frontend Developer | **Paytm Creditmate** | Mar 2019 – Aug 2020
SaaS and technology platform that helps banks, NBFCs and fintech lenders automate and manage overdue loan collections.

- Developed new web pages and data-driven interfaces in HTML, CSS and JavaScript for the collections platform.
- Built the company website and handled basic PHP/Laravel tasks.
- Turned Figma prototypes into UI improvements that simplified key user journeys for users of the platform.
- Debugged UI and frontend issues and fixed them together with backend developers and other teams.
- Managed releases through GitHub, covering version control, staging reviews and live deployment, with zero critical post-deploy incidents.

Frontend Developer | **DG Flick Solutions Pvt. Ltd.** | Nov 2017 – Feb 2019
India's largest photographic software company, offering software for wedding photographers, studios, printing labs and enterprises.

- Built software pages and product websites, converting PSD and Figma designs into clean, semantic HTML5 and CSS3, and delivered all projects on time.
- Created responsive HTML email templates and brochures for product launches and marketing campaigns.
- Added PHP form validation to product and enquiry forms.
- Debugged UI and frontend issues and fixed them together with backend developers and other teams.
- Improved page-load speed across the product websites with frontend optimisation.

EDUCATION

Bachelor of Engineering in Computer Science
Gujarat Technological University, India
